

Lost in Translation? Not Anymore!

While we do not currently offer translation services, we know how important it is for families of all backgrounds to feel included. That's why we're happy to recommend some simple, user-friendly tools you can use to translate our materials into your preferred language:

Google Translate (translate.google.com)

Upload documents, copy/paste text, or even use your camera to translate printed materials.

Microsoft Word

If you're using Word to view our documents, you can go to Review > Translate to convert the entire file into another language.

DeepL (www.deepl.com)

A favorite among schools for its more natural-sounding translations. You can copy/paste text or upload files for quick results.

Google Docs

Open any document in Google Docs, go to Tools > Translate Document, and select your language of choice.

Pro Tip: if you need help converting one of our PDFs into a Word or Google Doc for easier translation, let us know—we're happy to help with that part!
